

Caleb Stukenborg

281-743-3393 · Caleb_stuk8@tamu.edu

EDUCATION

Texas A&M University

Petroleum Engineering - Expected graduation date 2026 / GPA - 3.018

Katy High School

High School Diploma - May 2022 / GPA – 3.8596

PROFESSIONAL EXPERIENCE

Owner Stukenborg Pressure Washing, Katy, Tx Entrepreneur

March 2020 - Present

- Identified a gap in the local market for pressure washing services and acquired the necessary tools and equipment to deliver high-quality results.
- Created and implemented a comprehensive marketing strategy, utilizing flyers to showcase before-and-after transformations and attract new clients.
- Expanded the pressure washing business from servicing residential driveways and sidewalks to securing a contract with a local private school.

Precision Drilling (Rig 609), Shreveport, La Intern/Floorhand

June 2024 - July 2024

- Performed general maintenance on the rig floor, adhering to safety protocols and ensuring operational efficiency.
- Strapped, rigged up, and ran 24,000 feet of 5" production casing in two different wells on a multi-well pad.
- Tripped into/out of wellbore and operated iron roughneck equipment, demonstrating hands-on drilling experience.
- Conducted all manual labor tasks on the drilling floor, including rig moves, while maintaining a strong focus on safety and efficiency.
- Supported the driller in managing well-control procedures, including tracking kill sheet data, volumes, and performing critical calculations.

Wild Well Control, Houston, Tx Engineering Mentorship

June 2023- August 2023

- Collaborated with the engineering department, actively contributing to well control problem-solving efforts.
- Participated in meetings and urgent well control calls, gaining insights and understanding of complex issues.
- Engaged in discussions to explore and develop solutions for diverse well control challenges faced by clients.
- Acquired foundational knowledge of mud gas separators and flow rate management to prevent issues such as gas flow back to shakers and/or mud to the flare stack line.

Helmerich & Payne (Rig 260), Mansfield, La Intern/Floorhand

June 2022 - August 2022

- Conducted general maintenance on the rig floor with a strong focus on safety and operational efficiency.
- Strapped, rigged up, and ran 22,000 feet of 5" production casing for two wells on a four-well pad.
- Tripped into/out of wellbore and operated iron roughneck equipment; assisted in mixing chemicals to maintain optimal mud properties.
- Executed all manual labor tasks on the drilling floor efficiently and safely.
- Supported the driller in managing well-control procedures, including maintaining the kill sheet, tracking volumes, and performing calculations.

Wild Well Control, Houston, Tx Engineering Mentorship

June 2021- August 2021

- Collaborated with the engineering department on well control issues, gaining hands-on experience and insights.
 - Attended the IADC Well Control Surface / Subsea BOP stack course to deepen understanding of well control principles (note: did not take the certification test).
 - Participated in meetings and urgent well control calls, assisting the engineering team in addressing and resolving well control challenges.
 - Engaged in discussions to evaluate and propose solutions for diverse well control problems presented by clients.
 - Utilized Excel to create and manage kill sheets for vertical wells, incorporating essential equations and annotations for accurate data handling.
